

2018-2019

DECORATIVE
LIGHTING COLLECTION

nordlux®

Light that makes a difference

Lighting should be an exciting and fun part of the decor. Good lighting is essential, and lighting is one of the most important elements in creating atmosphere and ambience in a home. With the right lighting, a transformation occurs – from just a room into a universe or a home. This is where our lamps can make a difference.

This year, we present a large and exciting new range which, in addition to solid and competitive pricing, offers many different styles and trends which make it possible to choose lighting based on personal taste and style preferences. In the new collection, you will also find a number of interesting concepts that unfold the same design concept across multiple types of lamps, which means that we can offer a wider and more interesting range.

Our decorative range reflects the biggest contemporary trends, interpreted by us to be accessible and tangible to a wider audience. Right now, we see opalescent glass with brass details, coloured glass, new shapes and a variety of surfaces for lamps. Trends that can be easily converted and incorporated into the decor of your home, and perhaps even challenge a more traditional look.

We proudly present our 2018 collection

Decorative

Alton

Use golden tones to contrast the Nordic minimalism. The Alton series creates a beautiful unison between the simple opal white glass and the fine brushed brass details. The warm metals are still hot in decor, and the combined brass and glass give the series a graceful appearance and complement each other in the finest of manners.

Alton 23 PENDANT

No. 47303001 White/Opal white - White cable

Dean

Dean is a delicate and highly decorative series with different variations of table fixtures and a pendant light fixture. With references to the exclusive hotel style of voluminous furniture and sumptuous fabrics, Dean complements the current design trend of 'more is more'. The options are black or brushed brass with interesting details which make Dean elegant. The final expression is obtained by the choice of a decorative bulb which completes the extravagant look.

Hollywood

The Hollywood series has something nostalgic about it - it evokes the era of crystal decor, which in recent years has been rediscovered as a decor element. With its many facets, Hollywood adds a sparkling expression which contributes to a stylish atmosphere, providing an exclusive and pleasant mood. Available as a pendant and a table fixture, completed with the use of a beautiful decorative bulb.

Eik

In all its simplicity, The Eik series is still extremely decorative. The shape of the shade creates a pleasant light-emitting surface that offers a comfortable and beautiful glow.

The series is available as pendant, table and floor lamps. An obvious ease arises between the shade and the frame, and the adjustable shade on the table and floor lamps results in a flexible design.

Circus

Circus means circle and evokes memories of childhood circus performances, where fascination and ease were keywords. The clear, beautiful circular shapes have given the light fixture both its name and identity. The light fixture's simplicity leaves a little to the imagination and unites the soft curves and the tight expression elegantly. Circus consists of two pendant sizes, available in four colours; black, white, rose and petrol - which means the light fixture will look great in any decor.

Pisa WALL

No. 872623 Black
No. 872663 Anthracite

Master Box qty 2
Material: Aluminium
IP44, Class 2
H: 13 cm, W: 26,5 cm, D: 14 cm,
Cable: Excl. cable
E27, Max. 23W, Excl. light source
Parallel connection possible

Fixture energy class A++ - B

Momento WALL

No. 871023 Black/Clear

Master Box qty 3
Material: Aluminium/Plastic
IP44, Class 1
H: 21,5 cm, W: 15 cm, D: 8,2 cm,
Cable: Excl. cable
GU10, Max. 6W SMD LED, Excl. light
source
Parallel connection possible

Fixture energy class A++ - A

Momento WALL

No. 871123 Black/Clear

Master Box qty 3
Material: Aluminium/Plastic
IP44, Class 1
H: 15,5 cm, W: 29,5 cm, D: 9,5 cm,
Cable: Excl. cable
GU10, Max. 6W SMD LED, Excl. light
source
Parallel connection possible

Fixture energy class A++ - A

Momento GARDEN

No. 871423 Black/Clear

Master Box qty 2
Material: Aluminium/Plastic
IP44, Class 1
H: 70,8 cm, Ø: 13,8 cm, Base: 22 cm
Cable: Excl. cable
GU10, Max. 6W SMD LED, Excl. light
source
Parallel connection possible
Incl. base/spear

Fixture energy class A++ - A

Nene WALL

No. 872723 Black/Clear

Master Box qty 3
Material: Metal/Glass
IP54, Class 1
H: 6,4 cm, W: 14 cm, D: 8,85 cm, Base mount: 5,5 x 13 cm,
Cable: Excl. cable
Fixed LED, Incl. 6W LED
Parallel connection possible
5 year LED guarantee
Light source: Lumen 480, Kelvin 3.000, Candela 306,
Life hours 25.000, RA 80, Beam angle 42°, Not dimmable
Up and down light

Fixture energy class A++ - A

City WALL

No. 881123 Black/Clear
No. 881163 Anthracite/Clear

Master Box qty 3
Material: Metal/Plastic
IP44, Class 2
H: 35 cm, W: 12 cm, D: 11 cm,
Cable: Excl. cable
E27, Max. 60W, Excl. light source

Fixture energy class A++ - D

Delta Mini WALL

No. 873923 Black/Clear
Master Box qty 3
Material: Aluminium/Plastic
IP44, Class 1
H: 16 cm, W: 16 cm, D: 16,6 cm, Base mount: 16 x 16 cm,
Cable: Excl. cable
E27, Max. 60W, Excl. light source
Parallel connection possible

Fixture energy class A++ - D

Delta WALL

No. 873023 Black/Clear
No. 873031 White/Clear
No. 873063 Anthracite/Clear
Master Box qty 3

Pakning/Gasket ACCESSORIES

No. 2444999 Black

Master Box qty 12
Material: Plastic

Cable: Excl. cable

Nordlux is one of Scandinavia's leading suppliers of lighting. We design and manufacture lighting with great knowledge of, and consideration for, how light affects us humans and our wellbeing. It is an essential part of our product development. With manufacturing and product development also comes responsibility – a responsibility to protect the resources we have available, and the people we work with.

At the immediate level, this mainly concerns investing in continuous improvement, including via our product development. By focusing on low prices, we commit ourselves to looking at new, simple solutions and processes that use less material, as well as long-life technology. Basically, this means that we take into account many more elements than just that a design should be nice to look at. We assess whether a design can be made more appropriate and less costly through small adjustments. For example, it makes sense for the installation of our lamps to be as simple as possible, ensuring that no additional resources are required for installation. That is why we have more than 60 dedicated engineers, each with more than 10 years of experience in lighting technology, in our development department, all constantly working with this focus.

We are at the forefront when it comes to the development of energy-saving LED technology. You no longer need to compromise between the desire for a warm, pleasant light, innovative design, and the desire to keep power consumption down. Development in this area moves quickly, and new solutions and processes are constantly emerging, making it possible to combine aesthetics with greener technology.

We see sustainability as a task involving everyone associated with Nordlux – from the owners, board and management to employees and suppliers.

In a gentle way we can shake the world

LUMEN

(lm) is the measurement unit for lousinous flux.Louminous flux is the total amount of light that the light source submits.

KELVIN

(K) is the colour temperature of the light source- the higher number the colder light.
3000 K = warm white
4000 K = neutral white
6500 K = daylight white

GB - The LED technology is constantly under-going major development which contributes to continuous arrival of new and better LED bulbs on the market. Nordlux always strives to deliver the latest LED technology to our customers, which is why when purchasing lighting or bulbs, the new bulbs can seem different, with improved colour/light output/design.
*For additional bulb info please go to www.nordlux.com.

DK - LED er til stadighed under en betydelig udviklingsproces, som bevirker, at der med stor hyppighed kommer nye og bedre LED pærer på markedet. Nordlux bestræber sig på altid at levere den nyeste LED teknik til vores kunder, hvorfor man ved genkøb af lamper og ved tilkøb af pærer kan opleve, at de nye pærer har anderledes og forbedret farve/lysudbytte/udformning.
*For supplerende pæreoplysninger gå venligst til www.nordlux.com

RA

is the colour rendering that the light source provides.

CANDELA

(cd) is the measurement amount for brightness per angle that is submitted from a light source.

SE - LED är fortfarande under en betydande utvecklingsprocess, som bidrar till att det i snabb takt kommer nya och bättre LED lampor på marknaden. Nordlux strävar efter att leverera den senaste LED-tekniken till sina kunder, därför kan man vid återköp eller vid köp av nya lampor uppleva att de nya lamporna har en annorlunda och förbättrad färg/ljusflöde/utförning.
*För ytterligare information angående ljuskälla vänligen gå till www.nordlux.com

FR - LED est constamment en développement important, ce qui a pour effet d'amener très fréquemment de nouvelles ampoules LED améliorées sur le marché. Nordlux s'efforce de toujours fournir la dernière technologie LED à nos clients ; c'est pourquoi, lorsque vous rachetez des lampes et acquérez des ampoules, vous pouvez trouver que les nouvelles ampoules ont une couleur/une sortie de lumière/un design différents et améliorés.
*Pour plus d'informations concernant l'ampoule merci de visiter www.nordlux.com.

DE - LED unterliegt ständig einem bedeutenden Entwicklungsprozess, durch den mit großer Geschwindigkeit neue und bessere LED-Lampen auf den Markt kommen. Nordlux ist bestrebt, Ihren Kunden immer die neueste LED-Technik anzubieten, wodurch man beim Neukauf von Leuchten und Nachkauf von Leuchtmitteln erleben kann, dass die neuen Leuchtmittel eine andere und verbesserte Farbe, Lichtausbeute und Form haben.
*Für weitere Informationen gehen Sie bitte zu Leuchtmittel www.nordlux.com.

VEDLIGEHOOLDELSE

MAINTENANCE

PFLEGE

UNDERHÅLL

ENTRETIEN

Galvaniseret stål | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Nordlux giver 15 års garanti på alle udendørslamper i galvaniseret stål. Denne garanti gælder rustangreb med gennemtæring og er gældende mod fremvisning af købskvittering. Der ydes ingen garanti på dele som er beskadiget ved slidtage eller på fejlbehandling af lamperne.

Kobber | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Nordlux giver 15 års garanti på alle udendørslamper i kobber. Denne garanti gælder rustangreb med gennemtæring og er gældende mod fremvisning af købskvittering. Der ydes ingen garanti på dele som er beskadiget ved slidtage eller på fejlbehandling af lamperne.

Plast | Meget vejrbestandig. Kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring.

Rustfrit stål | Velegnet til udendørs brug, når undtages aggressive miljøer. Vedligeholdelse: Behandles med syrefri olie inden opsætning med efterfølgende aftørring med blød klud. Denne behandling gentages 3-4 gange om året.

Aluminium | Aluminiumsprodukterne kan opdeles i følgende: Ekstruderet og anodiseret aluminium er meget vejrbestandig og kan bruges i alle miljøer. Vedligeholdelse: Almindelig aftørring. Støbt aluminium i øvrigt er velegnet til udendørs brug, når undtages aggressive miljøer. Vedligeholdelse: Behandles med syrefri olie inden opsætning med efterfølgende aftørring med blød klud. Denne behandling gentages 3-4 gange om året.

Corten | Corten stål er en ståltype der er konstrueret med et indhold af kobber, fosfor, nikkel og chrom i et forhold der gør stålet rusttrægt på en måde, hvor den " færdige" rustne overflade beskytter stålet mod tæring 6-8 gange bedre end ved " normalt" rustent stål. Vær opmærksom på eventuel rustafsmitning i hærdeperioden. Hvis stålet nedgraves vil korrosionshastigheden være den samme som for almindeligt stål. Ordet Corten stål kommer af eng. "CORrosion resistant high TENSile steel".

Galvanized steel | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals. Nordlux offers up to 15 year anti-corrosion warranty on lights in galvanized steel. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust. The guarantee is subject to presentation of receipt. There is no guarantee on components which have been affected by wear and tear or mistreatment of the lights.

Copper | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals. Nordlux offers up to 15 year warranty on lights in copper. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust. The guarantee is subject to presentation of receipt. There is no guarantee on components which have been affected by wear and tear or mistreatment of the lights.

Plastic | Very resistant to weather. Can be placed in any environment. Maintenance: wipe off at regular intervals.

Stainless steel | Suitable for outdoor use, except for aggressive environments. Must be treated with acid-free oil prior to mounting. After mounting wipe off the fitting with a dry and soft cloth. This treatment should be repeated 3-4 times a year.

Aluminium | The aluminium products can be divided into two groups: Extruded and anodized aluminium is very resistant to weather and can be placed in any environment. Maintenance: wipe off at regular intervals. Cast aluminium is suitable for outdoor use, except for aggressive environments. Maintenance: must be treated with acid-free oil prior to mounting. After mounting wipe-off the fitting with a dry and soft cloth. This treatment should be repeated 3-4 times a year.

Corten | Corten steel is a type of steel which contains copper, phosphorus, nickel and chrome in a ratio that makes the steel weathering steel so that the "ready" rusty surface protects the steel against corrosion 6-8 times better than the "standard" rusty steel. Be aware of any rust staining in the curing period. If the steel is buried, its corrosion rate will be the same as for standard steel. The word "Corten" from "Corten steel" originates from "CORrosion resistant high TENSile steel".

Verzinkte Leuchten | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen. Nordlux leistet bis zu 15 Jahre Garantie für alle Aussenleuchten in feuerverzinkter Ausführung. Diese Garantie gilt für Rostbildung in Form von Angriff der Metal und gilt nur gegen Quittungsleistung. Nordlux leistet keine Garantie für Ersatzteile, die beschädigt sind durch Abnutzung oder Fehlbehandlung der Leuchten.

Kupfer | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen. Nordlux leistet bis zu 15 Jahre Garantie für alle Aussenleuchten in kupfer. Diese Garantie gilt für Rostbildung in Form von Angriff der Metal und gilt nur gegen Quittungsleistung. Nordlux leistet keine Garantie für Ersatzteile, die beschädigt sind durch Abnutzung oder Fehlbehandlung der Leuchten.

Kunststoff | Sehr wetterbeständig. Überall einsetzbar. Pflege: Normales Reinigen.

Edelstahl | Geeignet für den Außenbereich – jedoch nicht in aggressiver Umgebung. Pflege: Vor Montage muss die Leuchte mit säurefreiem Öl behandelt und mit einem weichen Tuch getrocknet werden. Dieses sollte 3-4 Mal im Jahr wiederholt werden.

Aluminium | Aluminiumleuchten unterscheiden sich wie folgt: Extrudiertes und eloxiertes Aluminium ist sehr wetterbeständig und ist überall einsetzbar. Pflege: Normales Reinigen. Gegossenes Aluminium ist ebenfalls für den Außenbereich geeignet – jedoch nicht in aggressiver Umgebung. Pflege: Vor Montage muss die Leuchte mit säurefreiem Öl behandelt und mit einem weichen Tuch getrocknet werden. Dieses sollte 3-4 Mal im Jahr wiederholt werden.

Corten | Corten Stahl ist ein Stahltyp, der mit Anteilen an Kupfer, Phosphor, Nickel und Chrom in einem Verhältnis hergestellt wird, das den Stahl auf eine Weise rostträge macht, durch die die „fertige“ rostige Oberfläche den Stahl 6 bis 8 mal so gut vor Korrosion schützt als bei normalem rostigen Stahl. Bitte beachten Sie, dass es im Härtungsprozess zu Rostabfärbungen kommen kann. Wenn der Stahl vergraben wird, ist die Korrosionsgeschwindigkeit genau so wie bei normalem Stahl. Das Wort Cortenstahl ist aus dem englischen „CORrosion resistant high TENSile steel" abgeleitet.

Galvaniserat stål | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning. Nordlux ger 15 års garanti på alla utomhuslampor i galvaniserat stål. Denna garanti gäller rostangrepp som har genomträngt och gäller mot uppvisande av inköpskvitto. Det lämnas ingen garanti på delar som har skadats vid slitage eller av felbehandling av lamporna.

Koppar | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning.

Plast | Mycket väderbeständigt. Kan användas i alla miljöer. Underhåll: Normal avtorkning.

Rostfritt stål | Lämpligt för utomhusbruk, utom i aggressiva miljöer. Underhåll: Behandlas med syrafri olja och torkas av med en mjuk trasa före uppsättning. Behandlingen upprepas 3-4 gånger om året.

Aluminium | Aluminiumprodukterna kan delas upp i följande typer: Extruderad och anodiserad aluminium är mycket väderbeständig och kan användas i alla miljöer. Underhåll: Normal avtorkning. Övrig gjuten aluminium är lämplig för utomhusbruk, utom i aggressiva miljöer. Underhåll: Behandlas med syrafri olja och torkas av med en mjuk trasa före uppsättning. Behandlingen upprepas 3-4 gånger om året.

Corten | Cortenstål är en ståltyp som är framställd med ett innehåll av koppar, fosfor, nickel och krom i ett förhållande som gör att stålet rostar långsamt och på ett sätt där den "färdigrostade" ytan skyddar stålet mot mod frätning 6-8 gånger bättre än "vanligt" rostigt stål. Var uppmärksam på eventuell rostavfärgning under härdningsperioden. Om stålet grävs ner kommer korrosionshastigheten att vara densamma som för vanligt stål. Ordet Cortenstål kommer av engelskans "CORrosion resistant high TENSile steel".

Acier galvanisé | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien: séchage général. Les lampes Nordlux en galvanisation bénéficient d'une garantie de 15 ANS à compter de la date d'achat sur le bon d'achat. Le garantie couvre formation de rouille (la surface est entamée) et n'est que si la date d'achat figure sur le bon d'achat. La garantie ne couvre pas le composants, endommagés par l'usure normale ou un emploi abusif.

Cuivre | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien: séchage général. Les lampes Nordlux en cuivre d'une garantie de 15 ANS à compter de la date d'achat sur le bon d'achat. Le garantie couvre formation de rouille (la surface est entamée) et n'est que si la date d'achat figure sur le bon d'achat. La garantie ne couvre pas le composants, endommagés par l'usure normale ou un emploi abusif.

Matière plastique | Très résistant aux intempéries. Peut être utilisé dans tous les environnements. Entretien : séchage général.

Acier inoxydable | Convient parfaitement pour l'utilisation en plein air, mais à l'abri des environnements agressifs. Entretien : à traiter avec de l'huile exempte d'acides avant l'installation, puis séchage avec un chiffon doux. Ce traitement est répété 3 à 4 fois par an.

Aluminium | Les produits en aluminium peuvent être subdivisés comme suit: L'aluminium extrudé et anodisé est très résistant aux intempéries et peut être utilisé dans tous les environnements. Entretien: séchage général. La fonte d'aluminium convient également pour une utilisation en plein air, mais à l'abri des environnements agressifs. Entretien : à traiter avec de l'huile exempte d'acides avant l'installation, puis séchage avec un chiffon doux. Ce traitement est répété 3 à 4 fois par an.

Corten | L'acier Corten est un acier conçu avec une teneur en cuivre, phosphore, nickel et chrome, dans une proportion qui rend l'acier résistant à la corrosion, d'une façon où le surface « finie » rouillée protège l'acier contre la corrosion 6 à 8 fois mieux que l'acier rouillé « normal ». Merci de faire attention aux tâches rouillées dans la période du trempé! Si l'acier est enfoui, le taux de corrosion doit être le même que pour l'acier ordinaire. Le mot « acier Corten » vient de l'anglais « CORrosion resistant high TENSile steel » (acier résistant à la corrosion à haute résistance).
