MOUNTING

The Hogar collection explores the world of patterns and embraces a more decorative approach to lighting.

While retaining their clean geometric structure, the new Hogar bollards and wall lights feature laser-cut perforated patterns on their surfaces. The traditional Moucharabieh pattern and the Kubric pattern showcased here are both created using this technique.

The Saoude pattern, meanwhile, explores the line of light itself by combining laser cutting with folded metalwork to direct and contain the interplay of light and shadow. :

The resulting lighting effect creates a distinctive atmosphere in outdoor spaces, whether on terraces, in gardens, or along pathways.

Hogar models can also be customized with a pattern of your choice. Share your project with us and enhance it with lighting, quality craftsmanship, and finishes shaped by Roger Pradier®'s unique expertise.
